LW8014

The dawning of a new era in domestic laundry appliances...

The Kleenmaid Eco Sensitive Washer, introducing exclusive Tri Synergy Technology

Tri Synergy

Digital Drive Motor

Model LW8014

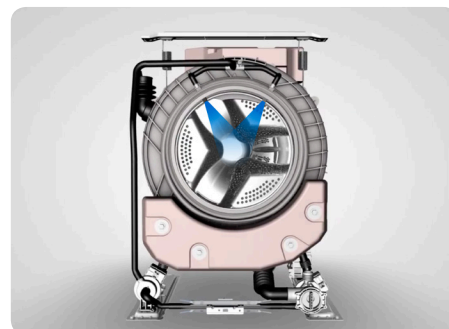

Imagine a washing machine with unique features that provide a better, gentler and more economical wash result. European engineered and manufactured, Kleenmaid's Eco Sensitive Tri Synergy technology does just that.

1. Detergent Mix and Spray, increasing the efficacy of the detergent for a better clean

When used in a Kleenmaid Eco Sensitive washing machine the laundry detergent is mixed with the water and sprayed into the machine under pressure. This process ensures that the detergent gently, yet thoroughly, penetrates the fibres of the fabrics being washed.

Increasing the efficacy of the detergent means that the temperatures used to launder the clothes can be lowered by as much as 50%. A traditional 40°C wash can be done at 20°C and a 60°C wash can be equally performed at 40°C.

Lowered temperatures means less wear on fabrics and allows whites and colours to be washed together saving you time.

Detergent Mix and Spray

2. The Dynamic Drum Design

Computer modelling and laboratory tests have determined that the number, size and shape of the holes in the drum of a washing machine are key factors in improving the gentleness and wash effectiveness. Holes which are too small do not allow the rinse water to flow effectively. Holes which are too large can damage fabrics. Kleenmaid's *Dynamic Drum Design* cleverly optimises the number, shape and size of the holes for optimal cleanliness. The Dynamic Drum design ensures no tangling, a better rinse, less water and energy usage and a superior wash result.

3. The Spiral Curved Agitators

The inbuilt drum agitators are the third link in the Tri Synergy system. The spiral curved shaping of the agitators continuously yet gently moves the wash load into the centre of the drum guaranteeing a comprehensive and total clean.

The perfect synergy between these three engineering elements combine to increase the water pressure in the drum enabling better water extraction during the spin cycle, resulting in a better wash.

- 4 Star MEPS energy rating ASNZS2040.1-2-2005 saving up to 60% on conventional technology
- Eco Sensitive 20°C wash as good as a conventional 40°C wash allowing mixed loads of colours and whites
- 8kg load rate with auto set timing and water level adjustment as the machine determines the weight of the load
- Rapid wash programmes from 12 minutes, and Intensive wash from 30 minutes
- High mount, extra-large door 47cm and handle for easy access and safer ergonomics
- Up to 15% less water consumption over conventional technology
- WELS water rating of 4.5 stars, 68 litres ASNZS6400-2500 water consumption

More Outstanding Features

**Boomerang
Wall panels**

Strength and Silence

The unique 'boomerang' design on the side walls of the LW8014 provide strength to the machine's cabinet and superior sound suppression. Additionally the 'boomerang' design increases the stability of the machine and decreases vibration thus prolonging the life of your machine.

Allergens and Bacteria

The LW8014 has the ability to provide four rinse options at a maximum temperature of 90°C.

Seven allergens and four bacteria types can be eliminated by using the 'Allergy Safe' programme providing you with the peace of mind that your wash is as sanitary as it can be.

15 fully customisable wash programmes

With the ability to select from three stain levels, multiple spin speeds up to 1400 rpm and cold to 90°C wash temperatures your Eco Sensitive LW8014 washing machine is at your service to provide the exact parameters for your desired laundry result. Easy ironing options are available as well to help in the post laundering operations.

Dimensions 845H x 597W x 582D

Door diameter 470mm

Eco Logical System

This function ensures the correct water levels and time of a wash by weighing the wash load prior to the commencement of a programme and ensuring the maximum saving of water and energy. You even know where the cleaning cycle of your LW8014 is up to thanks to the easy to read digital wash cycle indicator.

Safety and Protection

To protect your valuable investment the LW8014 comes with this list of impressive controls.

- Excessive foam control
- Unbalanced correction systems
- Overflow protection
- Multiple failure detection
- Pump filter cleaning time indicator
- Child safety lock
- Adjustable feet for exact installation

Our 3 Year Warranty

Kleenmaid's Eco Sensitive Washing Machine is covered by our 3 year full parts and labour warranty and is supported by our highly skilled national service network.
