Injury and Disease (includes workers and community) SAFETY				
Minor injury. No medical treatment Eg, cuts, bruises, no measurable physical effects.	MTI. Medically Treated Injuries from which recovery is likely. Eg, burns, broken bones, severe bruises, cuts.	LTI. Moderate permanent effects from injury or exposure. Eg, serious burns, serious internal and/or head injuries, gassings that require hospitalisation.	Single fatality and/or, Severe permanent injury, paralysis, brain damage, life threatening exposure to a health risk	A Multiple fatality and/or, Significant irreversible exposure to a health risk that effects greater than 10 people

LIKELIHOOD (FREQUENCY) RANKING SCORES

Likelihood	Description
Almost Certain (5)	Event expected to occur in most circumstances
Likely (4)	Event will probably occur in most circumstances.
Possible (3)	Event should occur at some time.
Unlikely (2)	Event could occur at some time.
Rare (1)	Event may occur, but only under exceptional circumstances.

Risk Categories / Conclusions
Extreme Hazard should be avoided (or the level of risk reduced significantly and reliably by controls)
High: Risk to be controlled as far as reasonably practicable
Moderate Risk is controlled as far as reasonably practicable
Low No further control measures necessary.
