3 single zone Hi-Light™ elements
2 dual zone Hi-Light™ elements

9 stage temperature control

Residual heat light

Emergency “off”

Locking Key

Large 26.5cm diameter cooking zone

Automatic heat selection

Timer Function

Benefits

Hi-Light™ elements offer faster heat times (compared to radiant elements), with a uniform heat distribution.

With 9 different settings, you can select the ideal cooking temperature for all types of foods to provide the great cooking results.

For added safety, the residual heat light indicates if the surface of the cooktop is still hot.

Cooktop will automatically shut down if any substance is spilled on the touch control area of the cooktop.

A safety feature to help prevent children from accessing cooktop controls. User can either ‘lock’ the cooktop whilst in operation or when it is off.

26.5cm cooking zone allows for cooking with large pots and pans.

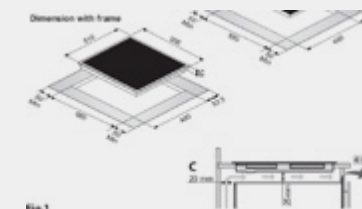

The rapid heat up function allows you to set the cooking zone to its maximum temperature for a period of time (approximately 7 minutes), after which the temperature will return to a lower value previously selected.

A convenient and easy way to program the cooking time on any cooking zone. An acoustic signal will indicate when the timer has ended and the cooking zone can be switched off.

Specifications

CCT905X -

90cm, 5 Zone Touch Control Cooktop

Dimensions: 54H x 906W x 516Dmm
